As a newcomer to the field of information technology, I am eager to enhance my skills and knowledge to become a web developer. I aspire to apply the theoretical knowledge I have acquired to practical projects. Besides that, I usually spend time exploring something new in technology to apply it to work and daily life.

EDUCATION

Bachelor's degree Information Technology   **Jan 2022 - Jun 2024**

University of Information Technology

   Studying for a second degree at the University of Information Technology (major: Information Technology)

Engineer's degree Automotive Mechanics Technology   **Oct 2016 - Oct 2020**

University of Transport and Communications - Campus in Ho Chi Minh city

   Studying Automotive Mechanics Technology - Degree grade: Good

PROJECTS

Employee MS 🔗   **Apr 2024 - May 2024**

   Objective: Develop Employee-MS web project including client and server side, supporting creating, editing, and deleting employee, department, and position information.

   Key Features:

- Management of employee, department, and position data
- Displaying lists of employees, departments, and positions
- Pagination for employees, departments, and positions list
- Employee search by name, department, or position
- Importing employee data from and exporting to CSV files

   Technology:

- **Frontend:** ReactJS, Javascript, HTML/CSS, Bootstrap
- **Backend:** NodeJS, Express, JSON Web Tokens
- **Database:** MongoDB (Mongoose)
- **Demo:** https://employee-management-system-client.vercel.app
- **Source:** https://github.com/AnNinh2605/Employee-Management-System

WORK EXPERIENCE

Developer   **Apr 2024 - May 2024**
University of Information Technology   **Ho Chi Minh**

   Employee MS - Personal project (Self-learning)

   After completing the Employee-MS project, I gained valuable experience in web development and project management:

- **Technology Development**: Improved skills in both front-end (ReactJS) and back-end (Node.js, Express) development.
- **API Development:** Gained experience in building API with RESTful APIs.
- **Data Management**: Learned how the data was transported from client to server, stored in database, and back.
- **Authentication**: Implemented authentication using JSON Web Tokens (JWT) and refresh tokens.
- **Input Validation**: Validated input data on both client and server side.
- **Deployment**: Deploying application on platforms like Vercel, Render, and MongoDB Atlas.
- **Project Management**: Use git to manage & save source code, and roll back when errors occur.
- **Self-Learning**: The importance of continuous learning and staying updated with the latest technologies.

Student   **Dec 2023 - Present**
UniGap   **Ho Chi Minh**

- Studying Backend Engineer course (**Software Engineer fundamental** + **Backend Engineer**) at Software Engineer - UniGap
- Main language: Java.

SKILLS

Programming Languages: Javascript, HTML/CSS, Java
Database Management System: MongoDB, MySQL
Frameworks/ Platforms: NodeJS, Express, ReactJS, Bootstrap
Other Skills: Git, Ubuntu-Linux Operation System, Postman

CERTIFICATIONS

TOEIC 795 by **IIG Viet Nam**   **Jan 2022**
